EDUCATION

Bangladesh University

B.Sc. in Computer Science & Engineering (CSE)

Sep 2013 - Feb 2017

Dhaka, Bangladesh

PROJECTS / OPEN-SOURCE CONTRIBUTION

01. Nexus | REST API

The Nexus REST API project utilizes Node.js, Express.js, and MongoDB for a comprehensive social media solution. With key features like user authentication, post CRUD operations, and user interaction options, the API ensures a seamless user experience.

Features: • User authentication • CRUD operations for posts • Liking / disliking posts • Following / unfollowing users • Timeline posts

Technologies Used: Node.js, Express.js, MongoDB, Mongoose ODM, REST APIs, JavaScript

Project URL: <https://github.com/naieem-bd/nexus-REST-API>

02. ShopBox | MERN Stack eCommerce Solutions

"ShopBox" is a feature-rich MERN stack e-commerce solution with user authentication, a user-friendly interface, shopping cart, order processing, user profiles, product reviews, responsive design, and secure PayPal integration. Empower your business to thrive online effortlessly.

Features: • User authentication • CRUD operations for posts • Liking / disliking posts • Following / unfollowing users • Timeline posts

Technologies Used: React.js, Redux.js, Redux Thunk, Node.js, Express.js, MongoDB, Mongoose ODM, React Router, Axios, CSS, JavaScript

Project URL: <https://github.com/naieem-bd/ShopBox-MERN-Stack-eCommerce>

03. Clean Redux Pattern

Elevate React state management with the 'Clean Redux Pattern,' offering a well-structured folder layout for clarity and modularity. Integration of Redux-Thunk and Axios streamlines asynchronous actions, while async/await simplifies code appearance for a cleaner workflow. Embrace this smarter approach to state management for seamless HTTP request handling and an enhanced development experience.

Features: • Simplify React state management • Organized and well-structured code • Better folder structure
• Proper way to use 'Redux-Thunk' • Clean Asynchronous operations

Technologies Used: React.js, Redux.js, Redux Thunk, Axios, Node.js, JavaScript

Project URL: <https://github.com/naieem-bd/Clean-Redux-Pattern>

04. IGDb | Internet Game Database

IGDb (Internet Game Database) is an advanced React app providing comprehensive game information. With efficient search, filtering, and infinite scrolling, IGDb offers optimal performance. Featuring a modern UI and integration of cutting-edge technologies, IGDb is your go-to platform for game exploration.

Features: • Game Search • Detailed Game Information • Filtering and Sorting • Infinite Scrolling • Data Caching • Responsive Design
• Easy state management with Zustand • Elegant and User-Friendly UI • RAWG API Integration

Technologies Used: React.js, Zustand, TanStack Query, React Router, TypeScript, REST APIs, Tailwind CSS

Project URL: <https://github.com/naieem-bd/IGDb>
